Describe your project accurately and how you developed your idea

my project, Materiamorfosi, was born twenty years ago in order to create a big number of different transformed pieces. Plastic bottles reuse has been one of my favourite subject, realizing a big number of works all of them uniquepieces. Since i knew roberto capucci's work i felt i had to give a tribute to his lifelong amazing work, so i started to sew a huge number of mineral water bottles.
