Team Members	2
Nationality	italian
Gender	Male
Date of Birth	
Mobile Number	
Country	Netherlands
State / Province	The Netherlands
Town / City	Amsterdam
Street Address 1	
Street Address 2	
Postcode / Zip	
University (just for students)	
Document	
Document Number	

Prize Category	Design
Project Title	Remark Stool
Source of the used material	From the streets of Amsterdam
Type of plastic involved	LDPE / HDPE
Other materials involved	no
Years of production	2018
Edition	2
Weight and Dimensions	3,6 kg - 35 x 35 x 42 cm
Manufactured by	Polimeer

Describe your project accurately and how you developed your idea

Can we make a stool out of nothing but plastic bags? Without screws, pins, glue or any type of reinforcement? The answer is, yes! The result has many favourable characteristics. As opposed to mass produced plastic items, this stool is repairable, unique as well as very easy to recycle. It is a mono material object, therefore it doesn't require complex disassembly. Challenging the notion of plastic as a cheap, disposable and unsustainable material. Furthermore every stool created will have a unique pattern and colour pallet. Polimarble® is crafted by hand in Amsterdam and it is a new innovative material made with recycled PE that look like marble !
